Profitable Feeds for Livestock and Poultry. They Lower Your Cost of Production and Make You More Profits

Through constant research and experiments the Ralston Purina Co. can be depended upon to give feeders the newest and best combination of feed ingredients. On the 740 acre experimental farm—chickens, hogs and cows determine which formula is most economical.

A Word to Gardeners and Farmers

Our stock is selected with the greatest possible care, both to trueness of variety and germination test, and while in common with other seedmen, we cannot guarantee the resulting crop, our customers may rest assured that we will exert every effort to get the most pure and best seeds obtainable for our stock. Our nearness to you makes both for the personal desire to please customers whom we know and often meet, and convenience to you in ordering and quick delivery. We maintain for the entire San Juan Basin a retail store where a welcome awaits you. We invite you to our store whether you buy or not. Perhaps we can offer some profitable suggestions in going over your gardening or farming problems.

Convert Legume Seeds Into Fertilizer Plants

by

Inoculating With

NITRAGIN

We encourage the farmer to inoculate all legume seeds whether planted on old or new fields. It costs but a few cents per acre. It seldom pays to depend upon natural inoculation.

NITRAGIN—is the oldest and most widely used inoculator in America, having served the American farmers since 1898.

COMBINATION (A-B)—Alfalfa, White and Yellow Sweet Clover, Hubam, Red, White Dutch, Alsike and Ladino Clover.

HINMAN

LOW-VACUUM

MILKERS

*Fast, Clean Milking
With Less Stripping.*

For more than 7 years, Hinman has pioneered the idea of low-vacuum milking. That principle has now been thoroughly established but it took years of research and thousands of tests to find the exact degree at which a cow milks best. Hinman found it—at 10 inches. Vacuum at 10 inches safely empties the udder faster. Besides, it makes the cow comfortable, and enlists her cooperation. Its mild action helps keep teats and udder in good condition—that's why so many Grand Champion cows for years have been milked exclusively with Hinman Milkers. New Hinman Air Flow Vacuum Pump with electric motor is a small, powerful, economical unit.

Book Them Early! **BABY CHIX**

They're Bred Right . . . to Lay Right!

ORDER Everybody wants good chicks this year
EARLY —so see us today to place your order.
THEY Our chicks are strong and vigorous . . .
bred to live, lay and pay
are Bred for High Production.
Come from Bloodtested Flocks.

Parent flocks get a special breeder ration. What a hen eats has a lot to do with vigor and livability of her chicks. Parent flocks are fed Purina Layena or Purina Breeder Lay Chow and grain. The rations pack the egg with nutrients needed during the 21 days in the shell plus a reserve to get the chick started with a bang.
